

10FT ISOPack 2000 6 Barg

Dimension

2991mm(L) x 2438mm(W) x 2591mm(H)

Capacity

7,700 Litres / 2000 US Gal

Tare Weight

5,370 KG

Payload

6,065 KG

Max Gross Weight

11,435 KG

The ISOPACK 2000 tank can be transported either individually or in pairs coupled together as one 20ft unit.

Using ISO approved twist locks the configuration allows for two ISOPACK 2000 tanks to be shipped on standard container ships anywhere in the world, by the most economical method.

This T75 UN portable tank has approvals for road, rail & sea transport. It also has CSC, DNV 2.7-1 and ISO 10855 approvals among many other options, and is designed, manufactured / tested for storing and transporting liquid nitrogen and can often be seen on offshore supply vessels being transported to oil production platforms all over the world.
